

Recommended battery module power supply brands

Do you need an uninterruptible power supply (UPS)?

If you have important electronics that have to keep running when the power's out, you'll need an uninterruptible power supply (UPS). We've reviewed our recommendations and are confident these are still the best UPS devices you can buy. Many smart devices have built-in battery packs, with modern laptops packing enough cells to last a whole day.

What are the best UPS devices?

So what follows is a considered and varied list of best UPS devices, which should sort you out in a pinch. If you refuse to settle for anything less than the best, the APC Back-UPS PRO 1500VA is the right uninterruptible power supply for you.

Is the APC ups be425m a good battery backup?

If you need a UPS and don't want to spend a lot, the APC UPS BE425M Battery Backup is for you. Its 425VA/225W power won't keep your desktop computer running for several minutes after a blackout, but it's perfect if you have a few smaller devices you need to keep powered up.

What is an uninterruptible power supply?

As the name implies, an uninterruptible power supply is just that: uninterruptible. This means power surges, blackouts, brownouts, and any other power-related problems won't result in your UPS going offline. The UPS will only turn off if its battery is emptied, it's turned off manually, or it is physically destroyed by an outside force.

Where can I buy a replacement UPS battery?

CyberPower sells replacement batteries for our top pick and upgrade pick, as do some third-party battery makers. Amazon Basics doesn't sell spare UPS batteries, but you can get a compatible replacement for our budget pick from Duracell, Mighty Max, and other well-established brands.

Who makes the best power supplies?
