## **SOLAR** PRO. Retrofitting solar street light price list

## How much do solar street lights cost?

This considers costs for components, installation, maintenance, and electricity bills. During the 15-year lifespan, traditional lampposts cost around \$12,000. Solar street lights with motion sensors or different models, only cost around \$5,000-\$6,000 for that same period, making them cheaper and more cost-efficient.

Where can I use solar street lighting in the UK?

With the largest selection of solar street, car park and general area lighting systems in the UK, we have lighting for all applications. Typical applications include streets, roadways, car parks, general outdoor areas, playgrounds, storage yards, footpaths, multi use games areas (MUGA), BMX pump tracks, horse riding arenas and such like.

How much does a street light cost in the UK?

When considering the average cost of a street light in the UK, several components come into play. The initial purchase price typically ranges from £500 to £3,000depending on the type and design chosen. This price often includes the fixture itself, which can vary widely based on materials and technology used.

How much power does a solar street light need?

This solar street light can be supplied with your choice of LED power. Luminaire power ranges from 30W up to 150W, an appropriate sized power system will be supplied with the system. This state-of-the-art lighting system is ideal for streets, car parks, open areas, public areas etc. Choice of column.

Why are solar panel street lights so popular?

Solar panel street lights are becoming increasingly available, powerful, and reliable, winning the competition against traditional lighting systems ever more often, even when old lighting system components are already available in stock and new ones still have to be produced.

Are auto-clean solar street lights a good choice?

Auto-clean solar street lights are perfect for challenging conditions, especially in snowy or polluted areas. The choice between different types of commercial solar street lights should be based on specific needs, budget, and local conditions, ensuring the optimal balance between solar street lighting cost and quality.
