According to the Study on the Optimal Energy Supply of the Sarajevo Canton, the total natural solar energy potential in the Sarajevo Canton is $1.6599 \cdot 10^{12}$ (kWh) . This value is obtained based on the product of the total surface area of the Sarajevo Canton and the average annual irradiance value for a horizontal surface.

Solar chargers for mobile phones and portable computers were placed in the center of Bijeljina and in the city park on Monday, 27 May. The solar chargers were part of a project that was realized by the city of Bijeljina and municipality Bogatic in Serbia as part of a program for cross-border cooperation. The official [...]

The average daily incident shortwave solar energy in Sarajevo is rapidly increasing during the winter, rising by 1.5 kWh, from 1.6 kWh to 3.1 kWh, over the course of the season. The lowest average daily incident shortwave solar energy during the winter is 1.5 kWh on December 22.

More than 20 new solar power plants will be built in the territory of Herzegovina. The Government of the Herzegovina-Neretva Canton only granted concessions for the construction of several solar power plants. As solarno writes, the concessions were granted for a period of 30 years, for larger power plants the one-time concession fee amounts to [...]
