

Why should you choose capacitor shop?

Why Capacitor Shop? Here are 5 good reasons to choose us: Quality. We stock quality Motor Capacitor products! The components that we supply form part of the esteemed DUCATI range and ItalFarad, which are widely recognised as being the best on the market.

What is a motor capacitor?

A motor capacitor is an electrical component that is commonly found in single phase AC motors. It is a device that stores electrical energy and releases it to the motor's windings at the right moment, helping the motor to start and run smoothly.

How do I order a capacitor?

Simplicity. Ordering is quick and easy with our user-friendly checkout cart system. Simply click the "Capacitor Shop" tab above, select your item from the dropdown menu on the next page and then enter a few billing and shipping details. Click "PLACE ORDER" and you're done. Speed. We deliver fast.

What is a motor run capacitor?

A motor's run capacitor is an important component that helps to ensure that the motor runs smoothly and efficiently. The run capacitor is responsible for creating a phase shift in the motor's electrical current, which helps to produce the rotating magnetic field that drives the motor's rotation.

What makes a good motor run & start capacitor?

The components that we supply form part of the esteemed DUCATI range and ItalFarad, which are widely recognised as being the best on the market. Expect motor run & start capacitors that offer low non-inductive winding loss and do not leak or short circuit. Price. High quality doesn't always equate with high costs.

Does a motor need a run capacitor?

The run capacitor is responsible for creating a phase shift in the motor's electrical current, which helps to produce the rotating magnetic field that drives the motor's rotation. Without a run capacitor, the motor may still run, but it is likely to experience a number of issues that can impact its performance and lifespan.
