What is solar LED lighting?

Solar LED lighting is a cost-effective and eco-friendly way to light up streets, outdoor areas at home and businesses. It utilises the sun's energy to power LED lights and provides clean and reliable illumination in areas without access to electricity.

What makes a good solar lighting company?

A good solar lighting company should keep stocks of light replacement repair parts, hardware and components for its customers. Solar Illuminations maintains an extensive stock of components to support most of the products that we sell. In the rare event that a problem may occur in the future, it can often be resolved by ordering a spare part.

Does solar illuminations offer a spare part?

Solar Illuminations maintains an extensive stock of components to support most of the products that we sell. In the rare event that a problem may occur in the future, it can often be resolved by ordering a spare part. We also offer replacement rechargeable batteries for all the solar lights we sell.
