

Solar photovoltaic panel loading and unloading video

How do I know if my PV modules have been shipped?

Before you unpack your modules, check the shipping label to ensure you received the right modules. Once you unpack your modules, check the module frame serial number and model label against the shipping label. The serial number is the unique identifier of each PV module.

What if a container is unloaded on the unloading platform?

If the container is unloaded on the unloading platform, it is required to be used with the unloading platform or tooling. The height of the unloading platform and the height of the unloading tooling should be kept at the basic level with the bottom of the container (loading bottom plate), and the height tolerance should be controlled within ± 10 mm.

What is a LONGi Solar module safety guide?

This guide serves as a reference for inspecting, transporting, unpacking, handling and storing LONGi PV solar modules to ensure safe practices for you and the modules. No matter where you are in the delivery and installation process, LONGi is here to help if something goes wrong.

Do you need a fuel oil forklift to unload a module?

If the modules are unloaded from long side forks, fuel oil forklifts are needed to unload. When someone is required to direct the hoisting box to fall during unloading, it shall be kept as flat as possible to avoid collision and throwing of the module box, and the ground shall be flat (Figure 8).

Why should I Choose flat ground when unloading?

In order to prevent the safety of placing and unpacking modules affected by tilt and uneven ground, please choose flat ground when unloading. If the modules need to be temporarily stored after unloading, it is recommended to keep sufficient space between each pallet to avoid scratching the carton or pallet during the second transfer.

How to choose a forklift for loading and unloading?

In the process of loading and unloading, the forklift should be selected reasonably according to the size and weight of the goods. If the fork length is less than 3/4 of the size of the goods, extension sleeves should be fitted on the forks before the module is forked, in order to avoid the packing container dumping when moving the forklift;

This document provides a safe work procedure for offloading, loading, and dispatching solar PV panels with a telehandler. It outlines responsibilities and definitions. The procedure specifies ...

This short video explains best practices for loading, banding, and unloading solar modules with your PV pallet

Solar photovoltaic panel loading and unloading video

Series X. Note that banding is always necessary to properly secure your PV ...

The load management system in the wall of your PVpallet Series X, also referred to as the "Slider Handles," helps with loading and unloading solar modules in an upright position.

To ensure the safety of loading, unloading, unpacking and storage of PV modules, please read this manual carefully. When you need to unpack and install the modules, you can search

#PVH is still at #WFES showcasing the best tracking solutions and control systems to optimize performance of any #solar asset. This model shows our Axone Duo single ...

PVpallet Series X (PVP000031) is a stackable, collapsable, adjustable pallet with walls on the 48" side for increased load protection. Made from post-industrial HDPE, these robust pallets are ...
