

## **The system has been updated and the battery is not durable**

Does Windows 11 24h2 affect battery life?

After updating to the Windows 11 24H2 version,I am experiencing significant battery-related issues on my device. This Include Faster Battery Drain: I have noticed a substantially reduced battery life compared to the performance before the update. Even during minimal usage,the battery percentage drops quickly.

How do I fix a battery not charging after Windows Update?

Here's the solution that worked for me: go to Windows Update - Repair,and install the latest repair version available. The battery started charging immediately,even while the installation was still in progress I am using update (KB5045991). Battery not charging. Stuck on 0%. I am using an ASUSTek laptop.

Why does my laptop not have a battery?

I have a laptop that does not contain a battery, it is always in a docking station which is connected to mains power. I've seen the battery charge level issue crop up a few times with drivers/firmware/Windows version updates. In this particular instance, it is an HP firmware update. Thank you or that information.

Is it time for a new battery?

Given that the system is on the order of three years old,it's more likely the battery has been declining due to normal aging and passed the critical threshold that tripped the warning. This will report the design and current charge capacity of the battery. It it's down to less than 50% of its design capacity,it's time for a new battery.

Does Dell power manager say battery health is 'poor'?

I checked Dell Power Manager and now it says one bar of health, battery health is 'Poor'. Coincidence? Probably not... I suspect the updates from Dell are the problem, not the battery which is genuine and has never had a problem. It is connected to power too, not running off the battery.

What if my laptop battery is over 25%?

Please plug in a power source; the process will continue when the charge is more than 25%",. (I'm pretty sure my laptop's battery was over 90% at the time). Then I try to shutdown by holding the power button. After 5 minutes, I plugged in the charger and turned on the device again.
