

Why is the government removing market barriers to energy storage?

In its response to EAC's report, published today, the Government has set out the steps it is taking to remove market barriers so as to support the rollout of energy storage projects at scale, in order to keep the lights on when renewable energy generation is low.

Why does the UK need long-term energy storage?

In May, the predecessor Environmental Audit Committee (EAC) warned that the lack of long-term energy storage in the UK was driving the importation of gas so as to balance the nation's energy needs. Market, policy and regulatory barriers were all holding back the development of long-term energy storage.

Will Neso make energy storage fit for the future?

Ministers confirmed that the system of energy storage is being reviewed with the National Energy System Operator (NESO) to help make it fit for the future.

How will the government align grid connections with strategic plans?

The Government has now given a commitment that it will align grid connections with strategic plans so as to accelerate connections for projects that are ready to generate electricity: the status of the queue will now be published, to allow for greater transparency.
