

Why do lithium batteries have plastic end caps?

It's because making lithium battery packs used to require special tools and highly skilled workers to use them. But not anymore! VRUZEND lithium battery building kits were designed to solve that problem. The plastic end caps slip tightly over the end of the most common lithium battery cell format, the 18650 cell.

How to build a custom lithium battery from 18650 cells?

And if you want extreme capacity, you can build a few battery packs and connect them in parallel, side by side, to create super high capacity batteries that are great for home energy storage. The VRUZEND battery building kit really is the best way to build a custom lithium battery from 18650 cells.

Are spot welded batteries worth it?

Spot welders are expensive. The good ones cost more than the price of most lithium batteries! Cheap ones are dangerous and prone to breaking when you need them most. Plus, spot welded packs can't be opened up to replace a single cell if it ever goes bad. VRUZEND kits can! With VRUZEND's innovative DIY battery kits, you simply work with your hands!

How do you make a custom lithium battery pack?

They can be snapped together like Lego(TM) bricks to create any size battery. Then simply bolt the cells together using the supplied connectors and you've got yourself a custom lithium battery pack for a fraction of the price of buying an off-the-shelf lithium battery pack.

What are vruzend lithium battery building kits?

But not anymore! VRUZEND lithium battery building kits were designed to solve that problem. The plastic end caps slip tightly over the end of the most common lithium battery cell format, the 18650 cell. They can be snapped together like Lego(TM) bricks to create any size battery.
