China's world-leading solar industry is grappling with a wave of company failures and consolidation. PHOTO: AFP SHANGHAI - More Chinese solar manufacturers are falling into restructuring or bankruptcy, with a deepening oversupply and fierce price wars causing massive financial losses and threatening many smaller players' survival.

Is the Chinese solar sector on the verge of widespread insolvency?

The Chinese solar sector is 'on the verge of widespread company insolvencies', according to Finlay Colville. Image: PV Tech.

What did Chinese solar industry group say last week?

A Chinese solar industry group last week called for measures to facilitate faster consolidation, including not sending financial help to companies that are set to fail. The group also encouraged larger players to buy smaller plants. BLOOMBERG Join ST's Telegram channel and get the latest breaking news delivered to you.

Are large solar companies declaring bankruptcy?

Recently, there have been increased reports of bankruptcies among large solar companies as the solar market space becomes more mature and solar prices continue to fall.

What happens if a solar manufacturer goes bankrupt?

This is because, unlike most industries, solar manufacturers who go bankrupt usually disappear rather than restructuring and keeping the market oversupplied. Bankrupt manufacturers don't typically have equipment others are willing to buy, which we saw with Suntech Power, Solyndra, Evergreen Solar, OptiSolar, and Abound Solar.

Are more bankruptcies coming to the solar industry in 2017?

Less than a month ago, I wrote that more bankruptcies are coming to the solar industry in 2017. This week, that prediction came true. SolarWorld, the European manufacturer of solar panels that had one of the largest manufacturing plants in the U.S., filed for insolvency.

The rate of new bankruptcies currently appears to be falling, but analysts at Tokyo Shoko Research note that last year the total debt of bankrupt solar companies almost doubled from 2019 levels ...
