

Should I buy capacitors from China?

Don't ever buy capacitors from China. Especially top brands from the post above. In addition to those there are: Vishay and Kemet are not "premium" grade electrolytic manufacturers. Kemet makes fine poly's and Vishay makes fine ceramic caps. I would not recommend either as first choice for Electrolytics.

Where can I buy a capacitor?

Capacitors seem to be one of those things that is counterfeited a lot, so definitely want to buy from good sources like Digikey, Mouser etc. Avoid Ebay, Aliexpress, Amazon etc as you don't know what you're getting. Re: Capacitor brands? Vishay and Kemet are not "premium" grade electrolytic manufacturers.

Are third-tier capacitors a good choice?

These third-tier capacitors, according to information from various PSU manufacturers and people with knowledge of RMA statistics, along with our own experiences with caps, might not be among the best choices, but are still a grade above the caps that belong to the last category. This group includes the rest of the capacitor brands.

Are there any good capacitor brands?

There are many good capacitor brands. Not in particular order.. I personally prefer Rubycon but for reasons of availability do sometimes use Panasonic/nichicon. There are also many other ok brands but i prefer the above. Re: Capacitor brands? Don't ever buy capacitors from China. Especially top brands from the post above.

Are Japanese capacitors safe?

When it comes to electrolytic caps, since they are hugely affected by increased temperatures caused by heat build-up at the PSU's internals (but mostly by current ripple), the caps made by Japanese manufacturers are the safest and highest-quality choice. This is also why Japanese capacitors are always preferred.

Are Kemet and Vishay capacitors the same?

Kemet also makes fine tantalum and ceramic capacitors. Vishay makes a lot of other fine stuff as well, like semiconductors and precise resistors. But you will rarely find Vishay and Kemet electrolytic caps in consumer equipment. Most of those go into industrial, telecommunication, automotive. Good to know... Re: Capacitor brands?

"Brand name" is one thing, but if you notice-- some of the best capacitors in the world are made in Japan (the noted Rubycon, Panasonic, and Nichicon are all Japanese companies). Japan still has extremely high quality control when it comes to electronic components, and this is the premium that you're paying for when it comes to Japanese-made components.

This is a list of manufacturers in India, we summarize the top 7 capacitor bank companies. Which can help you make the perfect choice. There are several well-established capacitor bank manufacturers in India that have been renowned ...

A capacitor is a passive device on a circuit board that stores electrical energy in an electric field by virtue of accumulating electric charges on two close surfaces insulated from each other. This is a list of known capacitor manufacturers, their headquarters country of origin, and year founded. The oldest capacitor companies were founded over 100 years ago.

Vishay and Kemet are not "premium" grade electrolytic manufacturers. Kemet makes fine poly's and Vishay makes fine ceramic caps. I would not recommend either as first choice for Electrolytics. Cornell Dubilier makes good very large capacity electrolytics but is not ...

Secondly, Nintendo did a good job of putting high quality Nichicon electrolytic capacitors in the SNES, so I would also advise anyone replacing capacitors to "not cheap out" if replacing them, and if possible, replace with a modern Nichicon equivalent capacitor if not doing what is commonly referred to by electronics folks as a "polymod" or replacing the caps with polymers ...

While removing old capacitors from the PC board, I saw that the bottom rubber plugs of some were distended. That made me think that a re-cap in this case was a worthwhile thing to do. My choosing Wurth capacitors was prompted by being on a fixed income and reluctance to sink more money than necessary into a 50 year old cassette deck.

TME also stocks Elite brand capacitors - these were also used a lot in lcd monitor power supplies, even in some regular computer power supplies... seen quite a few die, so definitely not to the level of Japanese brand name capacitors or even taiwanese capacitors. ... These brands are very good but less popular and expensive (except wurth ...

Electrolytic caps are the essential ingredient for a good PSU. To check the PSU offerings, read my Best ATX v3.x PSUs article before investing in a new power supply.

I would actually give it a try myself, but I'm sitting here with a Be Quiet Straight Power 12, 1200W, EVGA P2 Platinum 1200W, Seasonic Focus FX 850W, Corsair 850HX (that's more than a bit old but still working plenty fine), Corsair 750RMx, etc. Too many good, reliable power supplies, so there is just absolutely no avenue for me to even try justifying purchasing ...

TemCo, MaxRun, or PowerWell are some of the industry-leading brands that manufacture capacitors designed

to last up to two decades. In addition, HVAC manufacturers like Honeywell or ...

A capacitor is a passive device on a circuit board that stores electrical energy in an electric field by virtue of accumulating electric charges on two close surfaces insulated from each other. ...

+2, the reason "good" caps are considered "good" is that they have reputations proven over decades. Is it possible these "new" caps are good, maybe, but it is far more likely they are cheap junk constantly re-branded (to avoid a "bad reputation" by the time anyone figures out they're junk the name changes) and it would take several years (5+, 10+ would be better) ...

Wurth brand capacitors seem to be good value for the money. 62vauxhall; Mar 3, 2024; General Audio Discussion; 2 3. Replies 40 Views 3K. Jan 7, 2025. best-groove. Poll; Do different vendor crossover caps really sound all that different? Fred DuBuron; Mar 13, 2021; Speakers; 10 11 12. Replies 229 Views 20K.

Panasonic and Rubycon are my preferred choice. I've had a few issues with Nichicon caps that make me nervous about them- could have been a bad batch though. One brand that I have had very bad luck with is SURGE. ...

With new brands coming and old brands going, compiling a list of good/bad brands is a hopeless exercise, so the question is: How do I know a decent/good quality electrolytic capacitors, before I buy them? Let's assume: I know the brand (by calling/mailling the shop); The parts are genuine, non-counterfeits;
