

Where can I buy lead-acid battery insurance

Can you buy battery acid for lead acid batteries?

Individuals wishing to buy battery acid for lead acid batteries will no longer be able to legally do so unless they apply for and are granted an EPP Licence (Explosives Precursors and Poisons), as battery acid, or electrolyte, contains more than 15% sulphuric acid.

Can a lead acid battery be sent to the UK?

The UK postal service, prohibits the mailing of lead acid batteries, with the exception of small, sealed lead acid batteries that are used to power small electronic devices such as cell phones and laptop computers. These batteries must be properly packaged and labelled, and they may only be shipped by surface transportation.

Can You ship a lead acid battery?

Other carriers, such as Yodel and UPS, also have restrictions on the shipping of lead acid batteries. These carriers may allow the shipment of lead-acid batteries under certain conditions. Before shipping a lead acid battery, it is critical to check with the carrier for their specific requirements, such as proper packaging and labelling.

Is it safe to transport lead acid batteries?

In general, it is safer to transport lead acid batteries by ground transportation rather than by air, and it is important to follow all safety guidelines and regulations when handling and shipping these batteries. As a follow-up, the British Government has banned consumers from receiving batteries with a separate battery pack.

Are lead-acid batteries dangerous?

Battery Acid Advice Lead-acid batteries are considered hazardous materials because they contain lead and sulphuric acid. Of course, this can be dangerous if handled improperly. Shipping these batteries by post poses a risk of leakage, fire, or explosion and getting battery acid on skin.

What is a ready to use battery acid?

A ready to use battery acid with a specific gravity of 1.26-1.27. Used for filling most types of new commercial lead batteries. See Product Information sheet below for more information.®; **This product can only be supplied business to business or to those with a valid EPP license.

Really?! YeeHaw, something to buy that's MADE IN USA! I think I might have killed my battery recently and so I'm happy to support an American (i.e., U.S.) manufacturer! (note to self: Google "where is Optima made?") Is that a great big-*** battery like the OEM one? Either way, glad to hear it. Thank you for posting it, MisterBally!

Most car batteries are lead-acid, meaning they contain lead plates immersed in a solution of sulphuric acid and

Where can I buy lead-acid battery insurance

water. When you turn the key in the ignition, it triggers a chemical reaction between the lead and the acid ...

A lead/acid battery contains sulphuric acid which combines to the plates when discharged. After time, this lead sulphate becomes stabilised and is more difficult to dissociate into lead and sulphuric acid so capacity is lost. I do not think it matters how the battery is discharged. Keep the battery charged to reduce this effect to a minimum.
