

## Where is the small battery replacement cabinet

What is the smallest battery cabinet?

With a narrow footprint at only 19.7" wide, the cabinet can be configured for 1, 2 or 3 strings to add runtime. This cabinet is only offered at 432V DC, so can only be used with 93PM 3-Wire UPS models. The IBC-SW cabinet is our newest and smallest battery cabinet offering, with one large string of batteries inside.

Which side should a UPS battery cabinet be placed on?

Now the battery cabinet is ready to be placed aside the UPS. Both sides can be used for battery cabinet placement but for easier service access to UPS, on the 93PM 30-150 kW UPS right side is preferred, and on the 93PM 160-200 kW left side is preferred.

Are there any serviceable parts inside the battery cabinet?

There are NO USER SERVICEABLE PARTS inside the equipment. To reduce the risk of fire or electric shock, install this battery cabinet in a temperature and humidity controlled, indoor environment, free of conductive contaminants. Ambient temperature must not exceed 40 °C (104 °F). Do not operate near water or excessive humidity (95 % maximum).

How do you put a battery cabinet aside a UPS?

Insert the forklift jacks between the skids on the bottom of the unit. Open the package, remove the front and rear mounting brackets, and attach the ramp to a front edge of the pallet. Carefully slide the battery cabinet off the pallet. Now the battery cabinet is ready to be placed aside the UPS.

How to choose a battery cabinet for 93pm & 93e?

The battery cabinet should always be protected from the outside weather and sunshine. For the 93PM and 93E product lines, there are two different battery cabinets: Small and Large Battery Cabinet. The battery block configuration in the chosen battery cabinet must always match the UPS requirement.

How do battery cabinets work?

The battery cabinets use convection cooling to regulate internal component temperature. Air inlets are at the bottom and in Large Battery Cabinet also in the front of the cabinet and outlets are on the rear of the cabinet. Clearance must be allowed in front and rear of each cabinet for proper air circulation.
