

Which areas have more solar panels installed

Which UK areas have the most solar panels?

So, Anglesey, Devon and Dorset all lead the way with the highest number of households with solar installations at over 13%. Driving up the South West's household penetration to 7.08%. But then Cambridgeshire and the Scottish Borders closely follow with over 12% and 10% respectively.

How many people install solar panels in the UK?

A below average number of solar panel installations per 10,000 people (UK median 179). An above average percentage of homeowners (UK median 65%). Being in areas within Global Solar Atlas' highest 'PV power potential'. Using these criteria, only areas in England and Wales are included in this list.

How many solar panels are installed per month?

More solar panel systems are being installed per month now than at any time since 2015. There have been more than 415,000 solar panel installations since the start of 2022, which has grown the proportion of UK households with solar panels from 3.5% to more than 5%.

Which country has the most solar panels?

South West England has the highest percentage of homes with solar panels, as you can see in the map above. 7.08% of households in the South West have gone solar, which puts the region well ahead of its closest competitors. Wales is second with 6.01%, just ahead of the East Midlands on 5.63%.

Are solar panels a good investment in the south east?

The only exception is Plymouth, Moor View, where 59% of people own their home. There's a lot of potential in the south east of England, given the high 'PV power potential' of the area. There are plenty of areas in the sunny south coast that have a high proportion of homeowners, making solar panels a more likely prospect.

How many homes have solar panels?

On the flip side, only 12.8% of privately rented homes have solar panels. In terms of building type, 36% of solar panel systems are on detached homes, just ahead of semi-detached properties, on 31.4%. Terraced houses own 19.9% of solar installations, ahead of flats, which once again lag behind on 12%.
