

Why should you choose solar panels & battery packages?

Our solar panel and battery packages can save you up to 50%\*on your energy bills. Join the green energy revolution and generate your own clean renewable energy to power your home. With energy prices increasing yearly,generate your own solar energy and reduce your dependency on costly grid energy. Floor &Solid Masonry Wall Mounting.

Do smart solar panels need a battery backup?

In some parts of the country,new building codes mandate an electrical system that makes it easy to tie in solar panels and a battery backup. Many smart panels meet those requirementsmore elegantly than traditional setups would,with clunky main-panel /sub-panel designs.

Should you buy a smart circuit system?

Get it if you want it. "Smart circuit" systems from Savant,Schneider Electric,and Leviton offer as much control as most people realistically need,and can cost less. If you like to control your home through apps and assistants and that kind of thing,you have options. Span feels like the most powerful choice.

Which SMaRT panel is best?

Right now,the Spanis the best smart panel for this use case. Schneider Electric has told us that the Wiser modules that work with their Pulse panel will eventually be able to do this,but the feature isn't currently available.

Why is solar battery storage important?

Your solar panels generate renewable, solar energy during the day, this supplies electricity to your home. With energy prices on the rise, it makes sense to use as much of the free electricity your solar panels are generating as possible, instead of sending it back to the grid. Solar battery storage makes this possible.

Should I buy a Lumin SMaRT panel?

As long as you don't already need an entirely new electrical panel, the Lumin Smart Panel makes a lot of sense in this scenario. It's a sub-panel but smarter, with energy monitoring and enough flexibility to adjust energy management settings through an app in real time, if that's important to you.
