Are cheap solar panels a good investment?

Cons of cheap solar panels: Lower efficiency: Cheap solar panels are more likely to be less efficient, usually around 18-21% efficient rather than 20-23% efficient. Affordability hurdle: The upfront cost of solar panels, even cheap ones, is still a significant investment that may only be affordable for some homeowners.

Are solar panels affordable?

Solar panel affordability continues to increase thanks to falling prices, incentives, rebates, and flexible financing options. The solar panel with the cheapest price tag may not be the most cost-effective option in the long term. Consider efficiency, performance, and warranties when comparing your options.
